Our waters
need to heal.

Heal the Bay

Together, we have the power to heal.

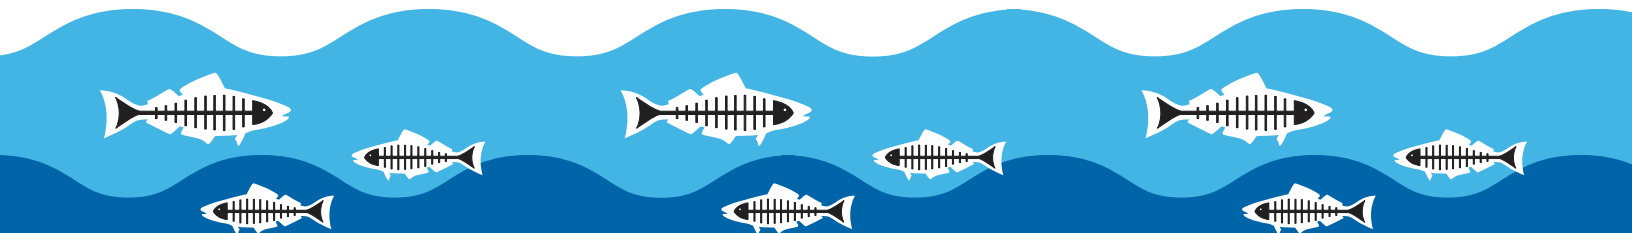

“Dear InsertInformalGreeting”,

Guided by science, Heal the Bay was founded in 1985 with the principle that one person can make an impact. For decades, our nonprofit has accomplished numerous victories by mobilizing thousands of donors, volunteers, students, and activists to make the coastal waters and watersheds of Greater LA safe, clean, and healthy.

Heal the Bay has pushed for County-wide measures that replenish our water supply sustainably. We’ve banned single-use plastic items in our cities to rid our favorite outdoor places from pollution. Our team helped prevent offshore drilling in the Santa Monica Bay. And, we have fought hard to ensure freshwater and ocean recreation areas in California are monitored for bacterial pollution to protect public health. The progress our nonprofit has made locally is significant, and you can trust us to continue to be at the forefront of solving the major challenges that lie ahead.

Our waters need to heal from the devastating effects of the recent sewage and oil spills as well as the legacy of DDT and other toxic forever chemicals and the increasingly severe impacts of climate change. Our team is focused on taking action to hold big polluters accountable. We’re working on strong environmental policies that phase out oil drilling along our coastline and in our neighborhoods, that increase water quality monitoring especially during crises, and that advance our wastewater recycling capabilities for a more resilient future.

Heal the Bay has achieved the impossible before, and we will do it again and again because we are here for good. Donate (insert \$custom amount*) as your Year-End Gift to Heal the Bay by December 31. You have heeded the call to act, and we are grateful for your ongoing support. Together, we have the incredible power to heal.
